Real crimbo trees are nice but i really dont miss haveing to go and get one, then hoovering up all the needles after, then carting it to the tip! we got a white! tree with fibre optics in it, nice and easy but it aint "real"

I love going for them. Have to make one trip apiece with the lads, and they pick the one they want when we get there. Christmas ain't the same without the smell of a Spruce in the house, I don't think. Plus, our Gert's the one who gets the needles up. :devilish:
