Are they all equal or are some makes better than others?

yeah, all the 'cheap ones' are all similar, but my proper 'HiLift' hasn't worn or suffered for being left outside like the cheapo's have slightly.

but i'm not sure if they are worth the extra cash, but does have a nice cast foot, and loop on top to use it as a winch.

it just 'feels' nicer, the ratchet pins never stick, like the difference between professional and cheap tools, i trust it more when pushed to the limit.

What make is yours and what's 'cheap'?

lol, yeah, HiLift is the big brand one, and I have a cheaper Farm Jack from Ebay, the cheap one is longer so slightly more useful.

There's a 60" Hi-Lift on eBay for just shy of £70, is that a good price?
