Renault Laguna (These are from a 'N' reg.) 3rd row seats, only 40 quid including delivery off Ebay.
Going to make a very strong, welded frame that can be bolted to the floor, and use the rear seat belt assemblies that I saved from one of the Lexus'.
Fold down arm rests and adjustable (up to adult height) headrests. The seats fold together too, either the base goes up or the back folds down so there's still room for shopping.

That looks neat Vince :)

Craig's going to love it
