Awesome!

Was that Graham driving?

Actually, I have wasted a 2002 Celica from the lights (two lanes into one) a couple of years ago, his engine was bouncing on the rev limiter trying to get in front! :)

Lexurf still needs the 02 sensers ...then she will possibly...ive recently done a 2 into 1 dust up with a vectra, but that

was easy. ive had a tussle witha little clio...again very easy. Had a nail biter with seat cupra thingy...but managed to smoke a diesel audi at the same time...i had bits of exhaust flame doing that one !

Eh? Gra, if your 02 sensors are playing up I would get new ones in there ASAP.

Apart from the engine running rough, you'll be using lots of go faster juice :whistle:
