would anyone have a spare front recovery hooks/front bars bolt kicking about? you know the ones, a pair either side under the chassis that bolt through the hooks and bars (if fitted), or perhaps know where i can obtain one (looked on milners and roughtrax, weary of going to a main dealer, ya just know those bstds are gonna pile it on, or anyone know what size the thread is, pitch etc so i dont look a complete dipsy doogle when i ask at the bolt shop (if there still is one in Pee-otrs-muff :D stripped the soddin thread on one!!! :mad:
oh ! and a drop of red oxide went straight in my eye when i was under there! F### did it sting
