So, if there was a hole from north to South Pole and brummie jumped in
A) would be make it right through to the other pole?
B) how long would it take?
C) would gravity mean he goes up and down like he was attached to a bungee cord?

I don't know, I go away for a few days and some daft bastard lets the inmates out of the asylum :no:
:whistle: :whistle:

Are you sure about this ?

when it isn't their season it's usually because they are in season (think fishing) - do we really want to hear the patter of tiny Brummie feet ? :yikes:

:/

Can we 'accidentally' nudge John in while we're dropping Brummie over the edge ?

Just asking like :whistle:

:devil:

:lol:

Tree rat, Brummie's are in season from the 31st of July to the 5th of September, I think in the world of press and media it's called the silly season....

I don't understand why you are all wondering what would happen if a hole was dug through to the other side of the planet. Matt's already done it :whistle:

Is that why he isn't commenting?
Is he stuck half way?

Feckers. :D

Ere, Brummie. Just jogged my memory of something seeing your name. You're in/around Solihull, aren't you? :whistle:

It will be a rusty sump which will leak 4 litres of black gunk into the carpeted boot of Brummie's pride and joy :whistle:

Currently running the motor off Matts Drummond... I think this is an ML3.

Also got this ilittle treasure.

Nice. :) That bottom one is an oldie. Just remember one thing when using those Charlie. If a piece is too long to fit between centres, it's too bloody long full stop. :D

:lol:

Nice one Charlie !

Matt, WTF isn't there a 'Like' button ???

PS

I mean for comments NOT for people :P

:devilish:
