Some sympathy and support for Bio as he had to drive a disco2 to help me deliver grapes as post operation I'm not allowed to do that sort of thing just yet.

He had a particular problem with the gear knob in not knowing where to put it.

Thank you Bio for stepping into the breach, I hope the twitching passes soon.

When are you getting it fumigated ?

He will survive - he drives a mini from time to time remember :-)

It's best not to go there or the creature may emit odious green smog and swearing

Rumour is it has been refitted and now all the ancillary stuff needs to go on, the weather seems to have changed to suit his mood which isn't good for grapes.....
